Del Norte Electrical Upgrades

Project overview Xcel Energy needs to upgrade the existing 4kV (kilovolt) system serving the Town of Del Norte to a 25kV system. The upgrade would consist of a complete rebuild of the overhead electrical system serving the majority of the Town. The upgrade would allow Xcel Energy to modernize the existing legacy system, replace a system that is at the end life. It will provide a better power quality and reliability. Work to start the summer of 2019 and end the fall of 2020, with minimizing impact to residence and businesses.
